

Essays on Classical Political Economy

A volume of essays entitled the *The Formation and Development of Classical Political Economy* has been published earlier this year in Japan. It is edited by Toshihiro Tanaka, and is the second in the series *Studies in Classical Political Economy*. (The first, also edited by Professor Tanaka, was noticed in *HETSA Bulletin*, No.12, p.65).

It contains ten essays in Japanese with English Abstracts (pp.265-9). The essays are by Professors Yoneda (on Boisguilbert), Ohta (on Dutot), Watanabe (on Steuart), Wada (on Steuart and Smith), Maruyama (on Ricardo), Nakanishi (on Malthus), Inoue (on J.S. Mill), Kumagai (on the Manchester School), and Nishizawa (on the English Historical School). It also includes a "special contribution" (in Japanese with English abstract) by Peter Groenewegen on "Marx's Conception of Classical Political Economy: An Evaluation". There is also an editorial preface by Professor Tanaka.
